Puretron® Pure water for drinking

Different water temperatures meet all your needs, it's convenient for making tea, coffee, and milk.

TPH-2032SBW New advanced Touch Panel Under Counter water boiler

Efficient UV sterilization

The ambient water is sterilized by UV, safe drinking pure water

Quantitative water (hot water)

Easy to dispense water, can be set to 150/350/500/700/1000c.c. (±10%)

Innovative touch panel faucet

The intelligent smart faucet has anti-scalding, thermal insulation, power off function with dual safety designs.

The storage under the sink perfectly integrates the lifestyle

Do not occupy the space, perfectly well fitted, a new choice for modern drinking water.

Quiet & brushless small pump

The only one used in Taiwan, the hot water output has big flow and quite stable.

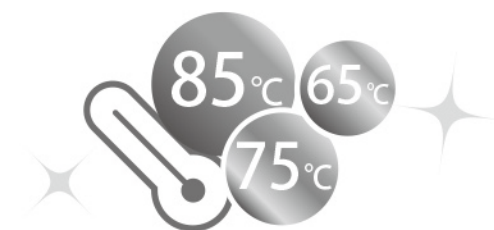

LED light

Intuitive color matching, the home presents different visual atmospheres when the light changes

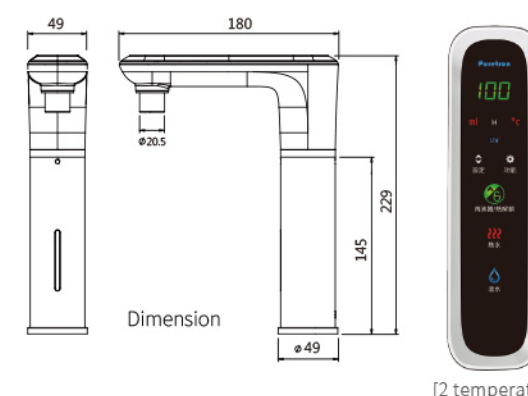

[2 temperatures]

Red and blue lights display the water status

Choose your temperature

It can be set to 85、75、65 degrees to make milk and tea, save time on getting instant drinking water safety.

3 temperatures

need to connect with external cold water system

- This DM is an introduction of features, please refer to the Manual for detailed info.
- The temperature shown in this DM is an indicative temperature, and the actual temperature is based on the temperature inside of the hot tank.

Safety and High Quality

※Non-traditional heating element

- One-piece stainless steel 316 heating element
- High speed heating efficiency! Save electricity! Save costs!
- Safer than other systems from the market, with high heating efficiency
- Overheating will not burst the tube, and will not peel off to produce carcinogens

SPECIFICATION

ITEM NO.	TPH-2032SBW	TPCCH-2032SBW need to connect with external cold water system
Temperature	Hot & Ambient Water	chilled & Hot & Ambient Water
Faucet	Touch Panel Tap	
Hot water power	1000W	
Hot water capacity	4L	
Dimension	W200xD320xH415mm	
Safety device	all series has circuit breaker and a safety fuse	
Voltage	220V, please use single power supply	
Note	1.hole size "30mm" on the table 2.Flow rate is according to inlet flow rate.	

Rotatable 180°

EXC-2042W

External cold water system

Dimension : W190xD420xH410mm
Power : 180W
Voltage : 220V, 50Hz
Cold water power : 1.8L
Water Source : RO water & Filtered water
Case Material : SECC white painting
